

Specialised Training for **SUPPLY CHAIN MANAGEMENT AND LOGISTICS**

Delivery Mode:  Online  Face to face  Hybrid

The future of business depends on agile, innovative, and sustainable supply chains. At Enterprises University of Pretoria, our Supply Chain Management and Logistics programmes empower professionals with the expertise to embrace innovation, solve complex logistics challenges, and create value across the entire supply chain. Gain practical insights, develop future-ready skills, and position yourself to drive successful supply chains while accelerating your professional growth.

Advanced Programme in Supply Chain Management for Senior Practitioners

Take your supply chain leadership to the next level. This advanced programme equips experienced professionals with the practical knowledge to optimise supply chain performance, improve operational efficiency, and make strategic decisions that create lasting organisational value.

Business Process Management

Drive meaningful business improvement through effective process management. Gain practical knowledge of the BPM lifecycle, process design, and implementation strategies to enhance efficiency, support organisational change, and deliver lasting business value.

Business Process Modelling

Transform the way your organisation works with practical business process modelling skills. Learn to analyse, map, and optimise business processes using industry-recognised standards to improve efficiency, quality, and continuous improvement.

Contract Management

Effective contract management is essential for organisational success. This practical course equips professionals with the knowledge to manage contracts, negotiate favourable terms, oversee service level agreements, and improve business outcomes.

Fleet Management

Drive greater efficiency across your transport operations with practical fleet management skills. Learn how to optimise vehicle utilisation, manage costs, strengthen risk and safety practices, and make informed fleet management decisions.

Hands on Supply Chain Management

Experience supply chain management in action. This practical course equips professionals with the skills to solve real-world supply chain challenges, make informed business decisions, and improve operational efficiency across the value chain.

Business solutions. Academic credibility.

PFMA Supply Chain Management Bid Committees

Build confidence in managing public sector procurement. This course equips professionals with the practical skills to implement PFMA supply chain requirements, manage bid committee processes, and apply procurement legislation with accuracy and integrity.

Negotiation Skills

Successful negotiation is a critical business skill. This practical course equips professionals with proven strategies and hands-on experience to negotiate with confidence, secure better outcomes, and strengthen long-term partnerships.

Supervisory Management Skills

Empower your supervisors with the practical leadership skills needed to lead high-performing teams. This course equips professionals to make confident decisions, improve productivity, and foster a culture of accountability and continuous improvement.

Supply Chain Risk Management: Identify, Analyse, Respond and Manage Risks

Stay ahead of supply chain disruptions with practical risk management skills. Learn how to identify vulnerabilities, develop effective mitigation strategies, and create resilient supply chains that support long-term organisational success

Programme in Supply Chain Management for Junior Practitioners

Develop the essential skills to succeed in supply chain management. This programme provides junior practitioners with practical knowledge to solve operational challenges, optimise logistics processes, and contribute to efficient, cost-effective supply chain operations.
